

Hello,

My company, Mystery Tackle Box, is a small business ecommerce retailer in the subscription fishing market. We send our tens of thousands of customers a package of fishing products every month. We have used USPS and their certified partner, OSM Worldwide, exclusively for over 3 and have spent close to \$1,000,000.00 in postage in the last year. We use the light weight parcel select class of mail and are concerned about the proposed rate hike of ~23.5%. I understand that an annual rate adjustment is needed, but the proposed increase percentage is excessive compared to prior years. The proposed rate changes would be crippling to our small business and we'd be forced to evaluate alternate providers and employ drastic cutbacks. We've been happy with the reliability of USPS and would highly prefer to keep our business with USPS. Please feel free to contact me for additional information about the impacts of the proposed rate increase to our business.
